DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,2,4-6 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cubukcu et al (6,074,771) in view of Buckley (6,086,609). Cubukcu discloses an electrical power generating device surrounded by shock absorbing and insulating material and comprising: electrical power generating device (10) consisting of an absorbing & insulating material made of a polyimide/polymer material and provides air cooling means. Cubukcu, however lacks a liquid cooling system. Buckley teaches an insulating jacket utilizing liquid cooling. It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize the liquid cooling system taught by Buckley within the disclosed invention of Cubukcu for a more effective means of cooling an electrical apparatus.

Allowable Subject Matter

Claims 15-25 are allowed over the prior art of record.

Claims 3,7 and 9-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
